Split Toning in Lightroom: Coloring to Advance Your Images

We're photographers. Our craft is our work. Our work is our art. To be moving forward with our work, we must be constantly on the search for creativity. We must develop; broaden the perspectives we see and the images we produce and the art we define.

When you come to that point when nothing seems to [...]

Making sense of Clarity, Vibrance and Saturation in Lightroom 2

In Lightroom 2 the collection of Basic fixes available for your image includes three Presence sliders that sit together in the Develop module: Clarity, Vibrance and Saturation.

This week I'll explain the differences between these three adjustments and how they affect your photos. In each of the screenshots below I have set the slider value to [...]

Wrapping a label around a cylinder

The screenshot shows a tutorial page from PhotoshopCafe. At the top, there's a header with the title 'Wrapping a label around a cylinder' and 'Photoshop Tutorial'. Below this, a paragraph explains the tutorial's purpose: 'Here is another tutorial that has come about by a request from the forum. This is how you wrap something around a cylinder. This is useful for creating labels for cans etc.' A list of 'INGREDIENTS' includes Gradients, Cylinder, Layers, Filters, Transforming, and Layer Blending modes. The difficulty is rated '2/10'. There are links for 'More Great Tutorials' and 'PhotoshopCAFE home'. A 'STEP 1' section begins with the instruction: 'Begin with a cylinder, or make your own with the gradient tool. If you make your own, set the gradient to reflected and linear.' Below the text is a small image of a person running in a museum hallway, which is the artwork being wrapped around a cylinder.

Super Silhouettes

Channel your way to a perfect silhouette

Aug. 9, 2006

Get ready kids! Here comes possibly the most requested Photoshop tutorial ever: How to make yourself (or another) into a silhouette like [Apple's iPod ads](#). I held off as long as I could, but we all know it was bound to happen (thanks to Tucker MacDonald for finally pushing me over the edge).

Truth be told, this technique is really easy--on the right type of photo, that is. If you're lucky, the person or object you wish to silhouette lives on a solid or white background, thus making them way easy to select with Channels (and believe me it's worth *retaking* the shot on a solid color background).

If not, well, you're left with the task of creating the selection by hand using the Background Eraser, the Lasso, the Extract filter, or (gasp) the evil Pen tool itself. (NOTE: Just kidding. I don't really think the pen tool is evil per say, just a bit persnickety.)

But why?

Besides being the "effect of the moment", creating the coveted silhouette is a neat effect to use for avatars (little icons used in instant messaging clients and in forums or bulletin boards), and perhaps as a framed gift for family or friends. I'm seeing tons of photographers creating matted silhouettes of profile shots for extra bucks. Um, that's about all I can think of :)

Super Silhouettes
Channel your way to a perfect silhouette
Aug 8, 2009

Get ready kids! Here comes possibly the most requested Photoshop tutorial ever: How to make yourself (or another) into a silhouette like [Apple's iPod ads](#). I held off as long as I could, but we all know it was bound to happen (thanks to Tucker Macdonald for finally pushing me over the edge).

Truth be told, this technique is really easy--on the right type of photo, that is. If you're lucky, the person or object you wish to silhouette lives on a solid or white background, thus making them way easy to select with Channels (and believe me it's worth **retaking** the shot on a solid color background).

If not, well, you're stuck. I suggest creating the selection by hand using the Background Eraser, the Lasso, the Extract filter, or (gasp) the evil Pen tool. (NOTE: Just kidding. I don't really think the pen tool is evil per say, just a bit persnickety.)

But why?

Besides being the "effect of the moment", creating the coveted silhouette is a neat effect to use for avatars (iBlogs icons used in instant messaging clients and in forums or bulletin boards), and perhaps as a framed gift for family or friends. I'm seeing tons of photographers creating matted silhouettes of profile shots for extra bucks. Um, that's about all I can think of :)

So, without further adieu, here we go! I'm going to cheat and use a photo of a beautiful girl I found on [iStockphoto.com](#) after performing a search for "girl on white background."

Locate the darkest channel

Step 1: Pop open a Soon To Be Silhouetted Photo and double-click the Background layer so it's editable.

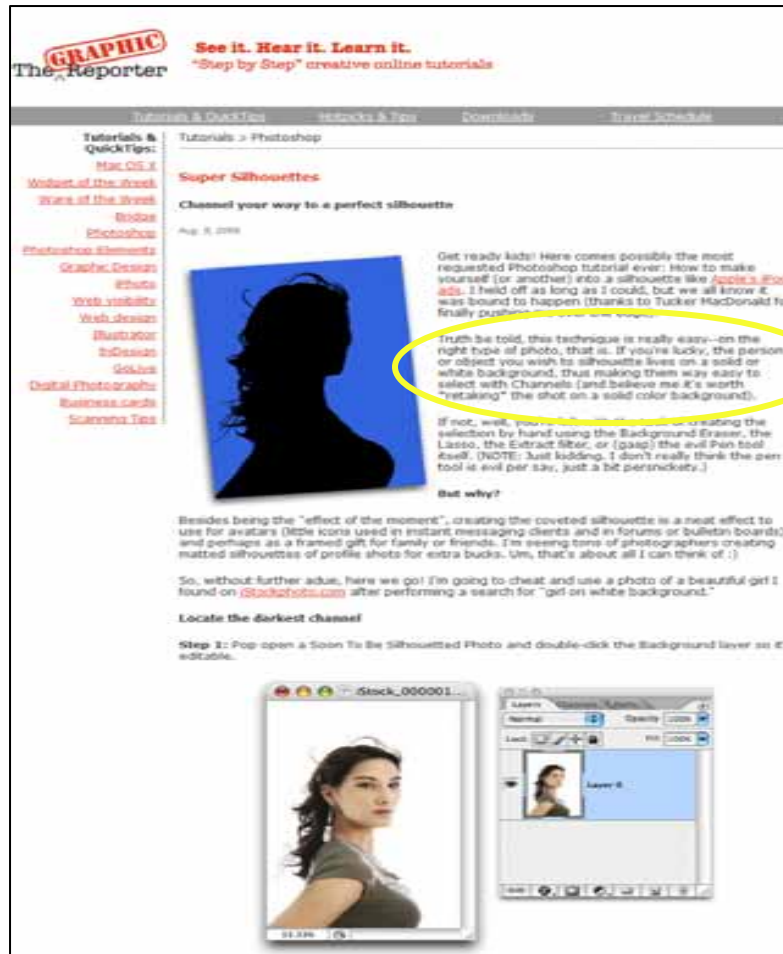

The screenshot also shows a Photoshop interface with a photo of a woman and a channel panel. A yellow circle highlights the text "Truth be told, this technique is really easy--on the right type of photo, that is. If you're lucky, the person or object you wish to silhouette lives on a solid or white background, thus making them way easy to select with Channels (and believe me it's worth **retaking** the shot on a solid color background)."

Recommendations

- Look for difficulty rating & consistency
 - Grading or leveling implies more people have reviewed the tutorial
 - Star ratings indicate some level of quality
 - Same author(s) will have practice & consistent format
- Find what works for you
 - Written steps or streaming video?
 - Screen shots or live desktop?
- Be ready to go back & try again
 - Keep two windows open or print out written tutorial
 - Might not work the first time
- Be flexible
 - Use parts of the tutorial or go find a new tutorial

Take The High Road

Post by Ferrell McCollough at 12:58 am

hello everyone, I hope all is well. I've been absent for awhile, my dad passed away in November and this economy is so horrible I'm being careful about booking travel. But spring is around the corner and I look forward to emerging from hibernation.

Here is a recent shoot that I finished and I wanted to share my approach to getting the final image. I hope you enjoy.

PHOTOSHOP DISASTERS

Begin This Clone Tool Has

Have you seen a *truly awful* piece of Photoshop work? Clumsy manipulation, senseless comping, lazy cloning and thoughtless retouching are our bread and butter. And yes, deep down, we *love* Photoshop.

If it is *commercial* and *awful* then please [let us know!](#) Anonymity can be arranged for the easily embarrassed/canned.

Although I am hopeless at replying to email, be assured that each and every tip is followed up.

Getty/CNN: Tails You Lose

U.S. airlines fly 2 years without fatality

STORY HIGHLIGHTS

[Next Article in Tr](#)

From Shelby Erdman

CNN

photoshopdisasters.blogspot.com

(CNN) -- For the first time since jet airliners took to the sky, U.S. carriers have gone two years without a single passenger fatality.

TEXT SIZE

A single year without fatalities has occurred only four times since 1958, an analysis by the Air Transport Association found.

Thus, the two-year streak in 2007 and 2008 is a the more remarkable, considering that airlines ferried more than a billion passengers.

"That stellar record isn't something that came about by accident," David Castelveter, spokesman for the ATA industry group, told CNN.

The industry, he said, "has been working hard for years, looking at past accidents so as not to have similar things happen in the future."

Well, there could well be a fatality if they find out who did this.

Daily Fail: What Is Your Major Malfunction?

The *Daily Mail* is essentially the UK equivalent of *Fox News* and *Michelle Malkin*. It features numerous pieces complaining about immigration, foreigners, Europe, how everything is hopelessly awful, etc.

If it had any good old British blood of steel in its newsprint-veins of justice it would do something about the terrible Photoshopping that is undermining that great nation's sense of pride in its media. After all, didn't Churchill once say (continued on page 97).

Thanks to everyone who sent this in! Hastily (and blurrily) fixed version is [here](#).

STORY HIGHLIGHTS
